

After careful thought and consideration, the Oxford Township Trustees have determined that, at this time, the proposed Data Center is not in the best interest of Oxford Township. While we recognize the potential opportunities such a project may present, there remain too many unanswered questions and unknown variables for the Township to make an informed and responsible decision.

In reaching this conclusion, we have carefully considered the concerns expressed by the residents of Oxford Township, as well as those from the surrounding communities. As elected officials, it is our responsibility to act in the best interest of our community, and we believe that additional information and greater certainty are necessary before moving forward with a proposal of this magnitude.

Respectfully,

Brian Miller
